

ZainCalls Lite

ZainCalls Lite is a streamlined version of the standard ZainCalls Pro, offering core functionalities with a simplified interface.

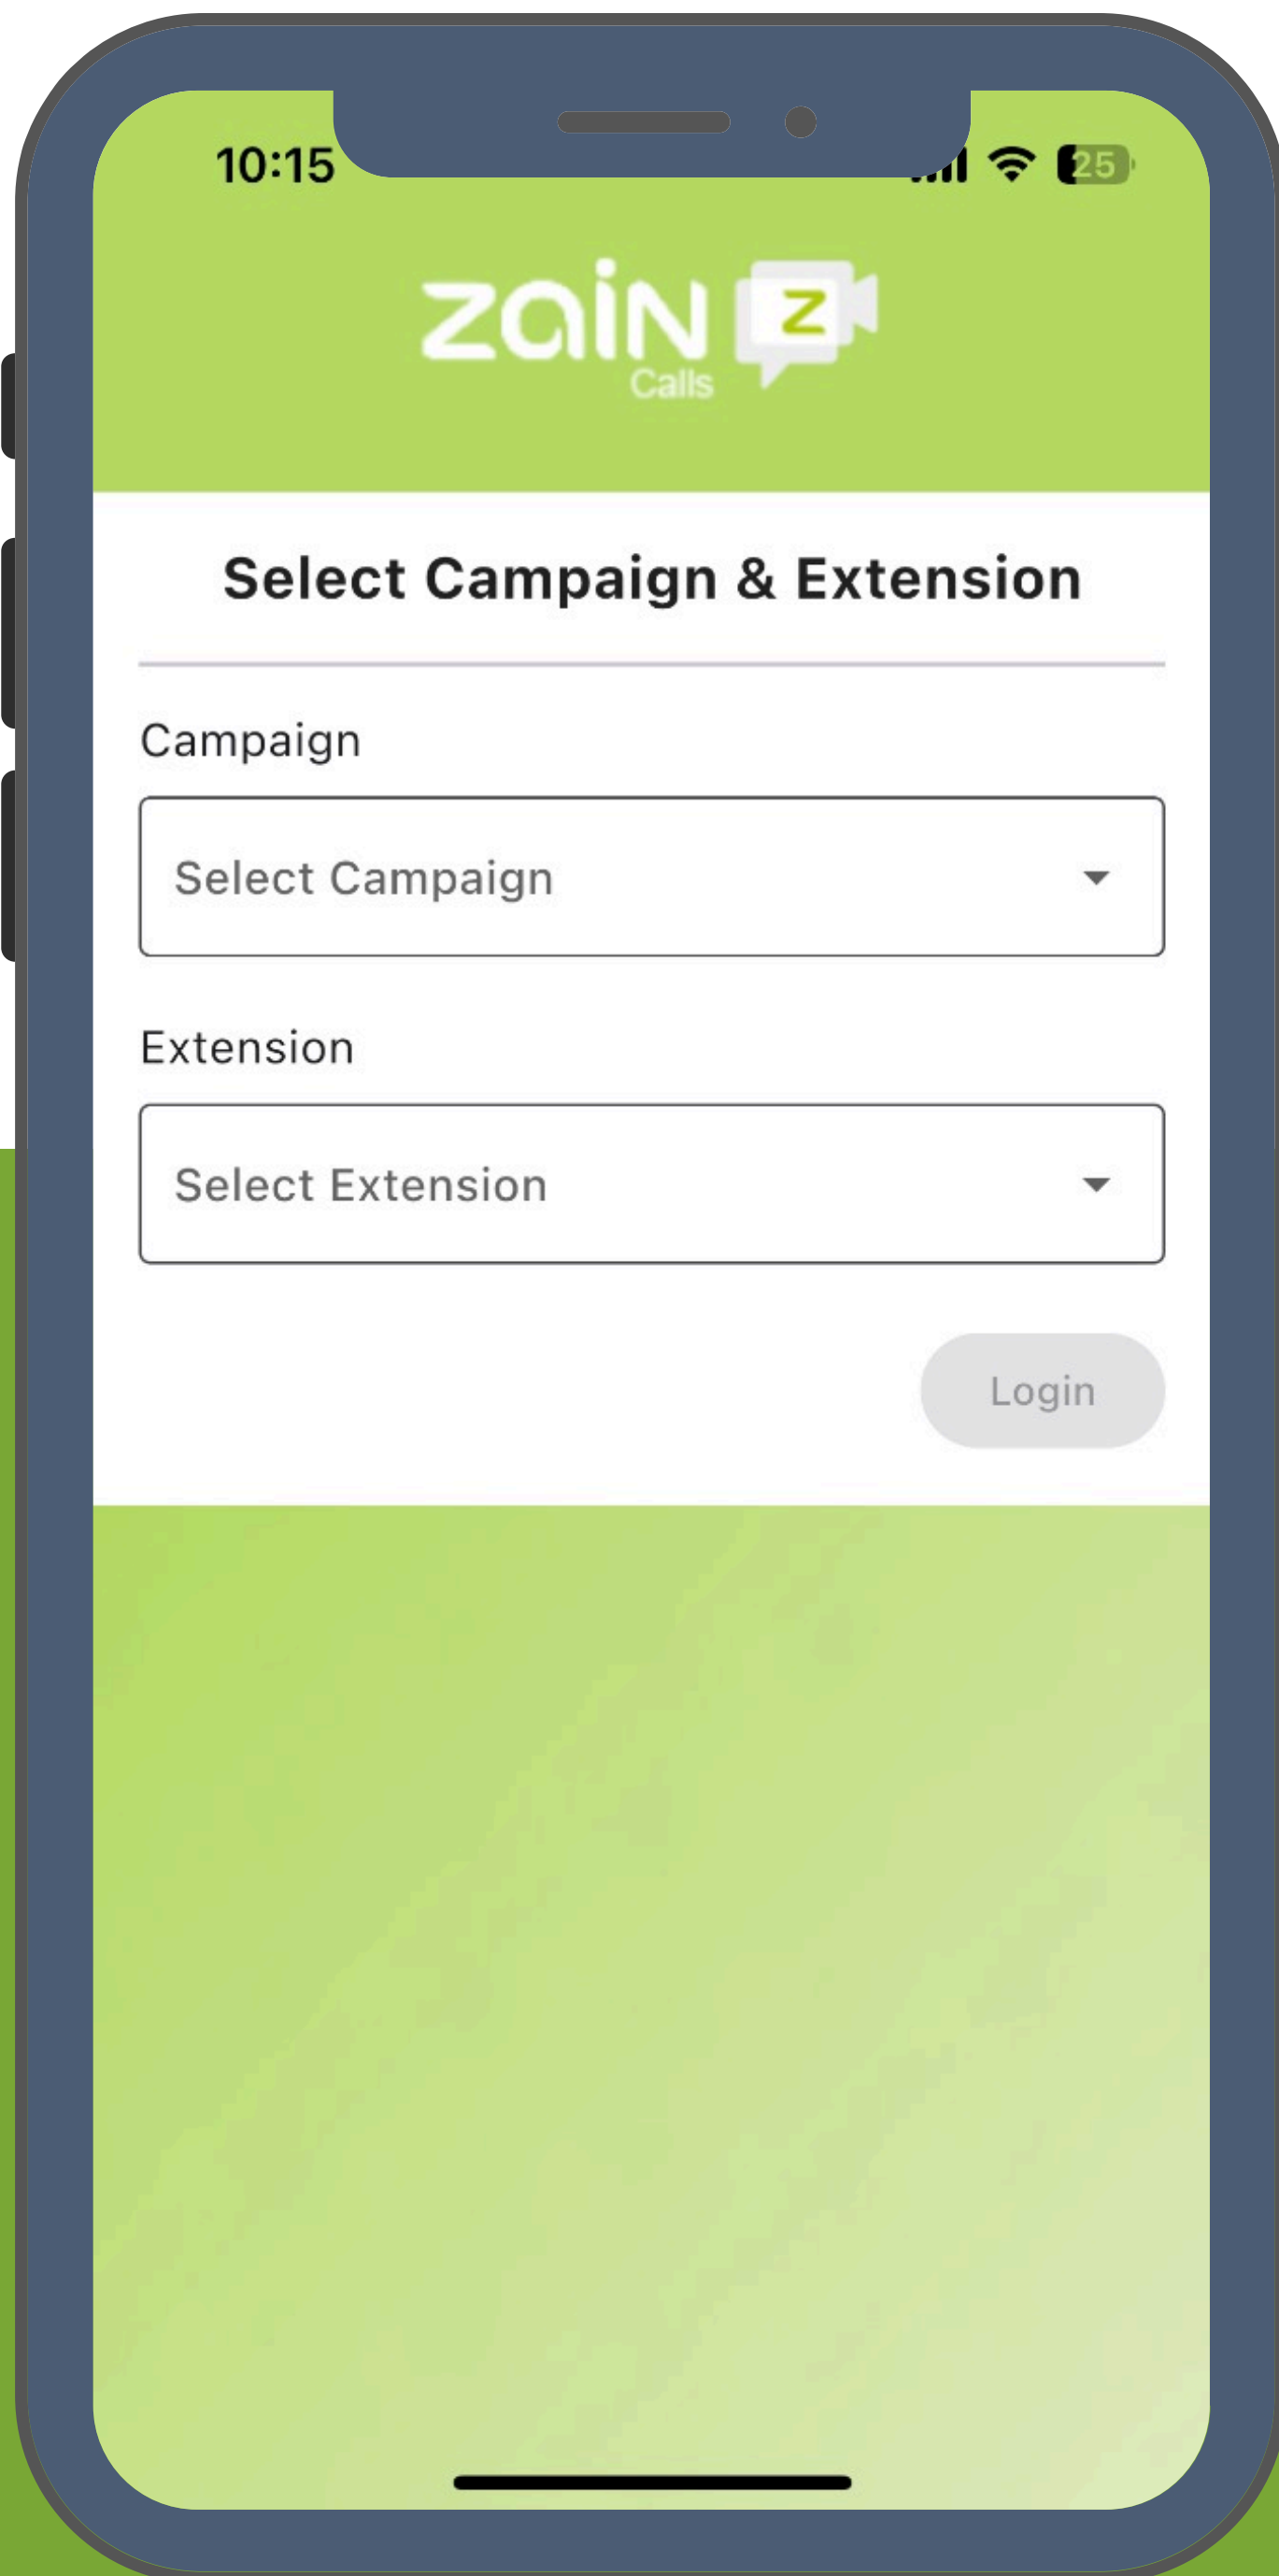

It allows users to manage their call availability by updating their status (e.g., Ready/Not Ready)

for making and receiving calls. The application is compatible with multiple platforms and can be easily downloaded for cross-device use.

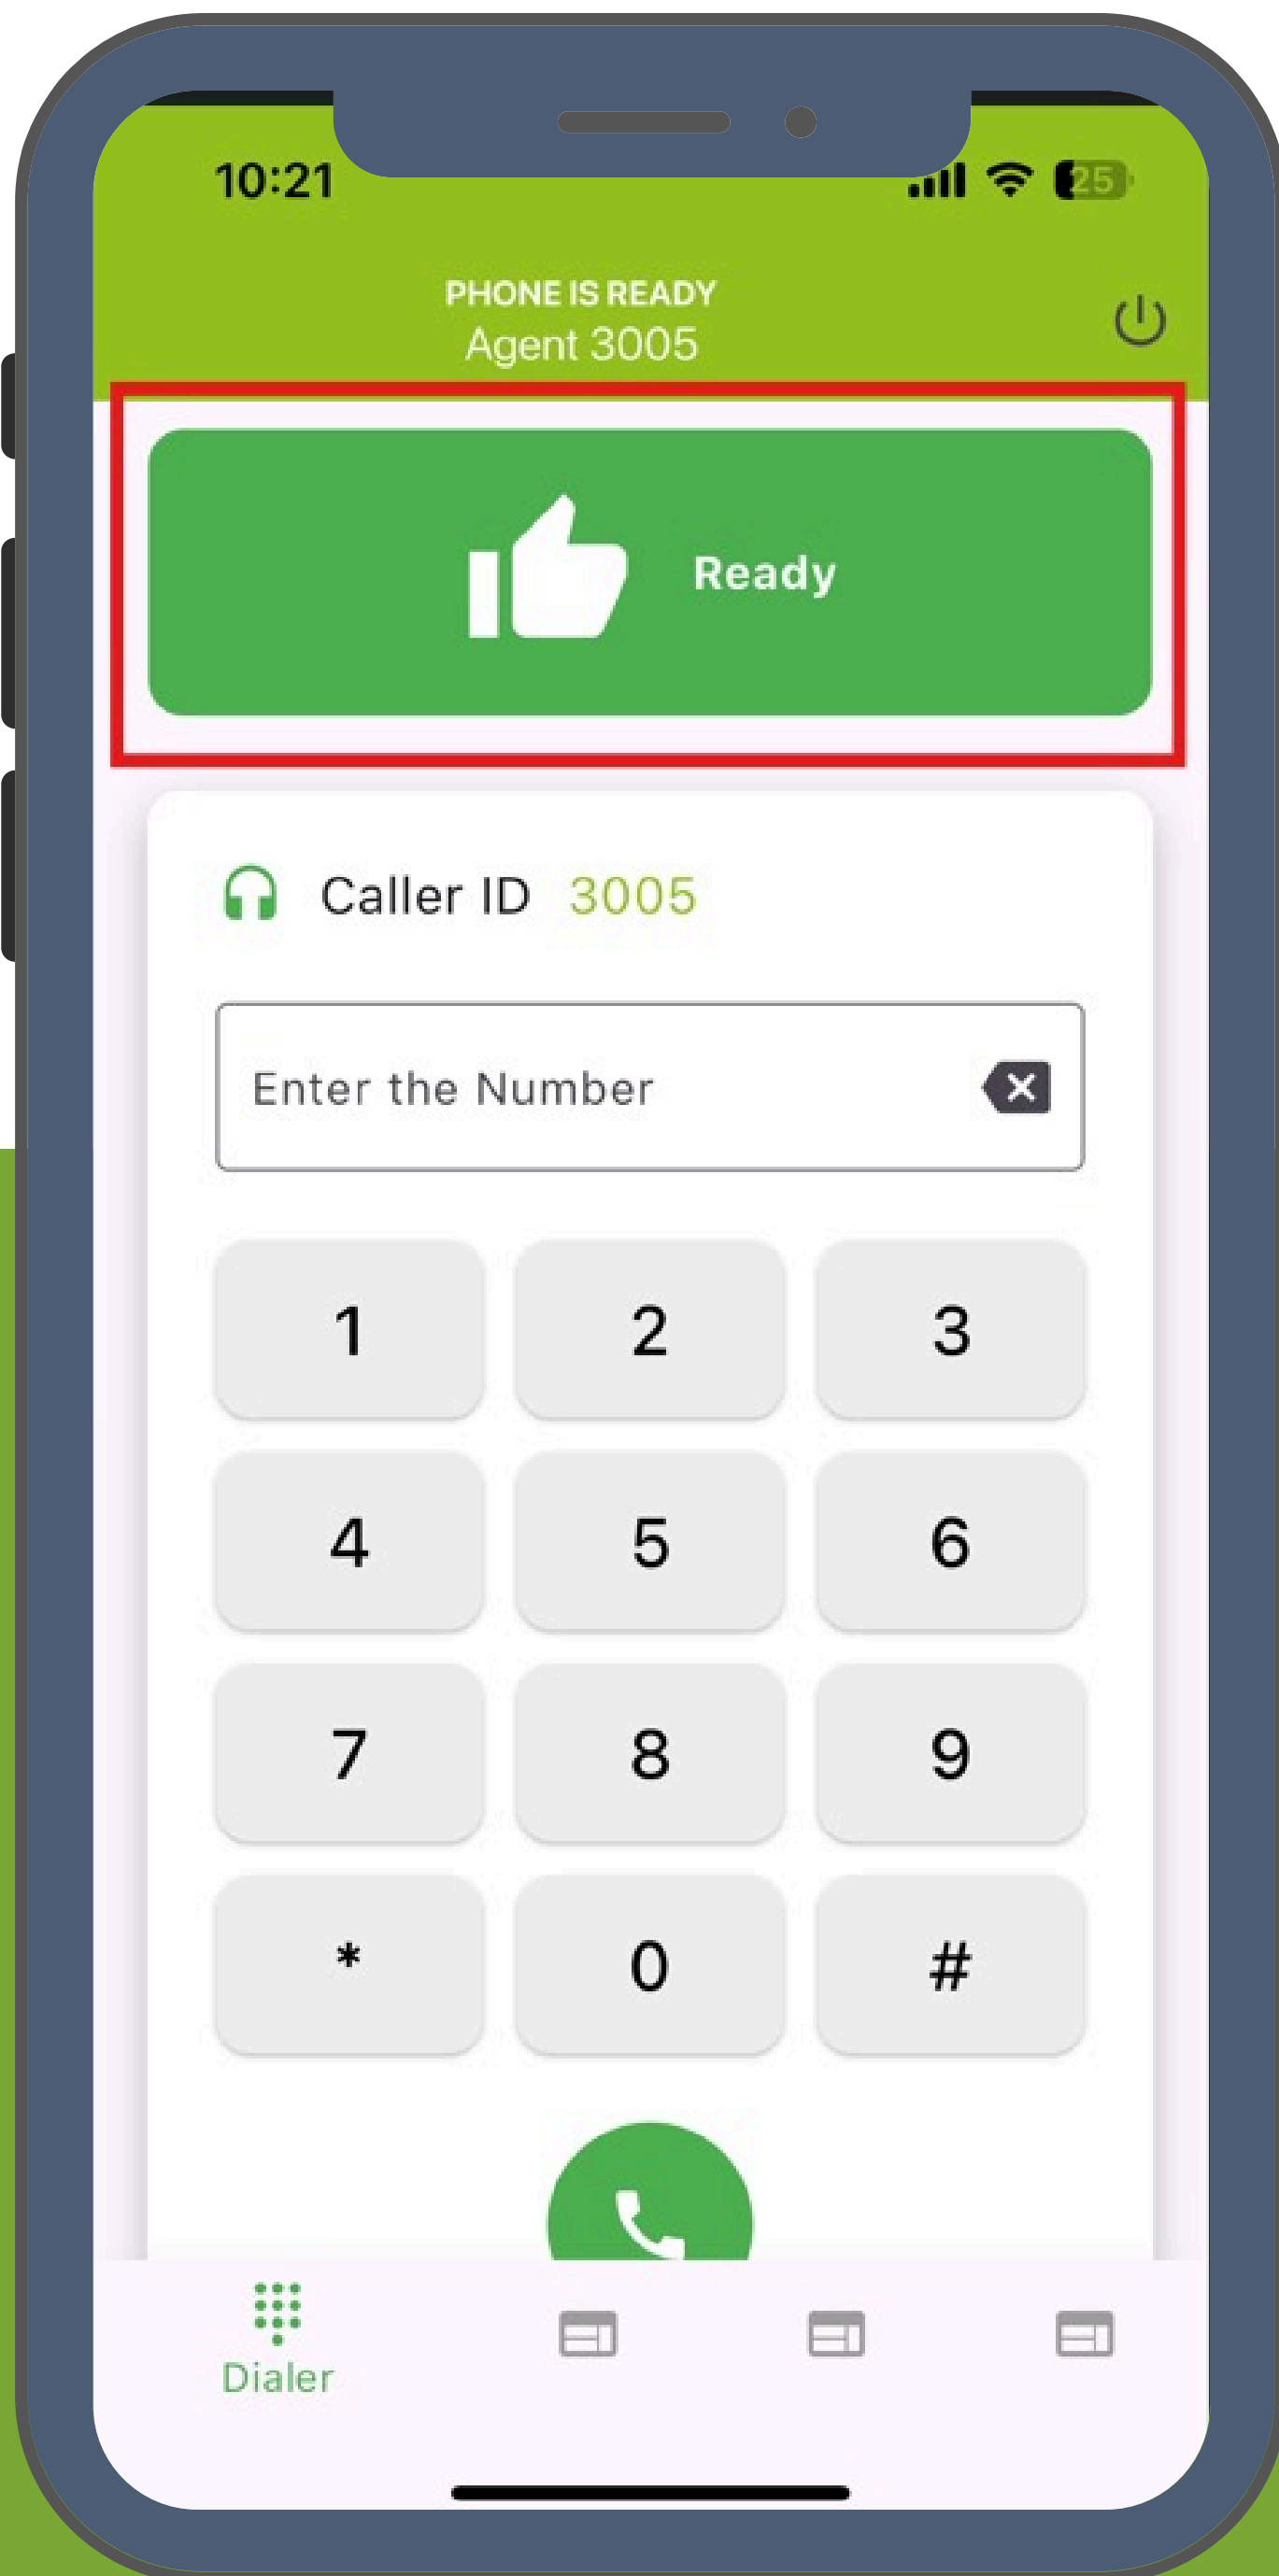

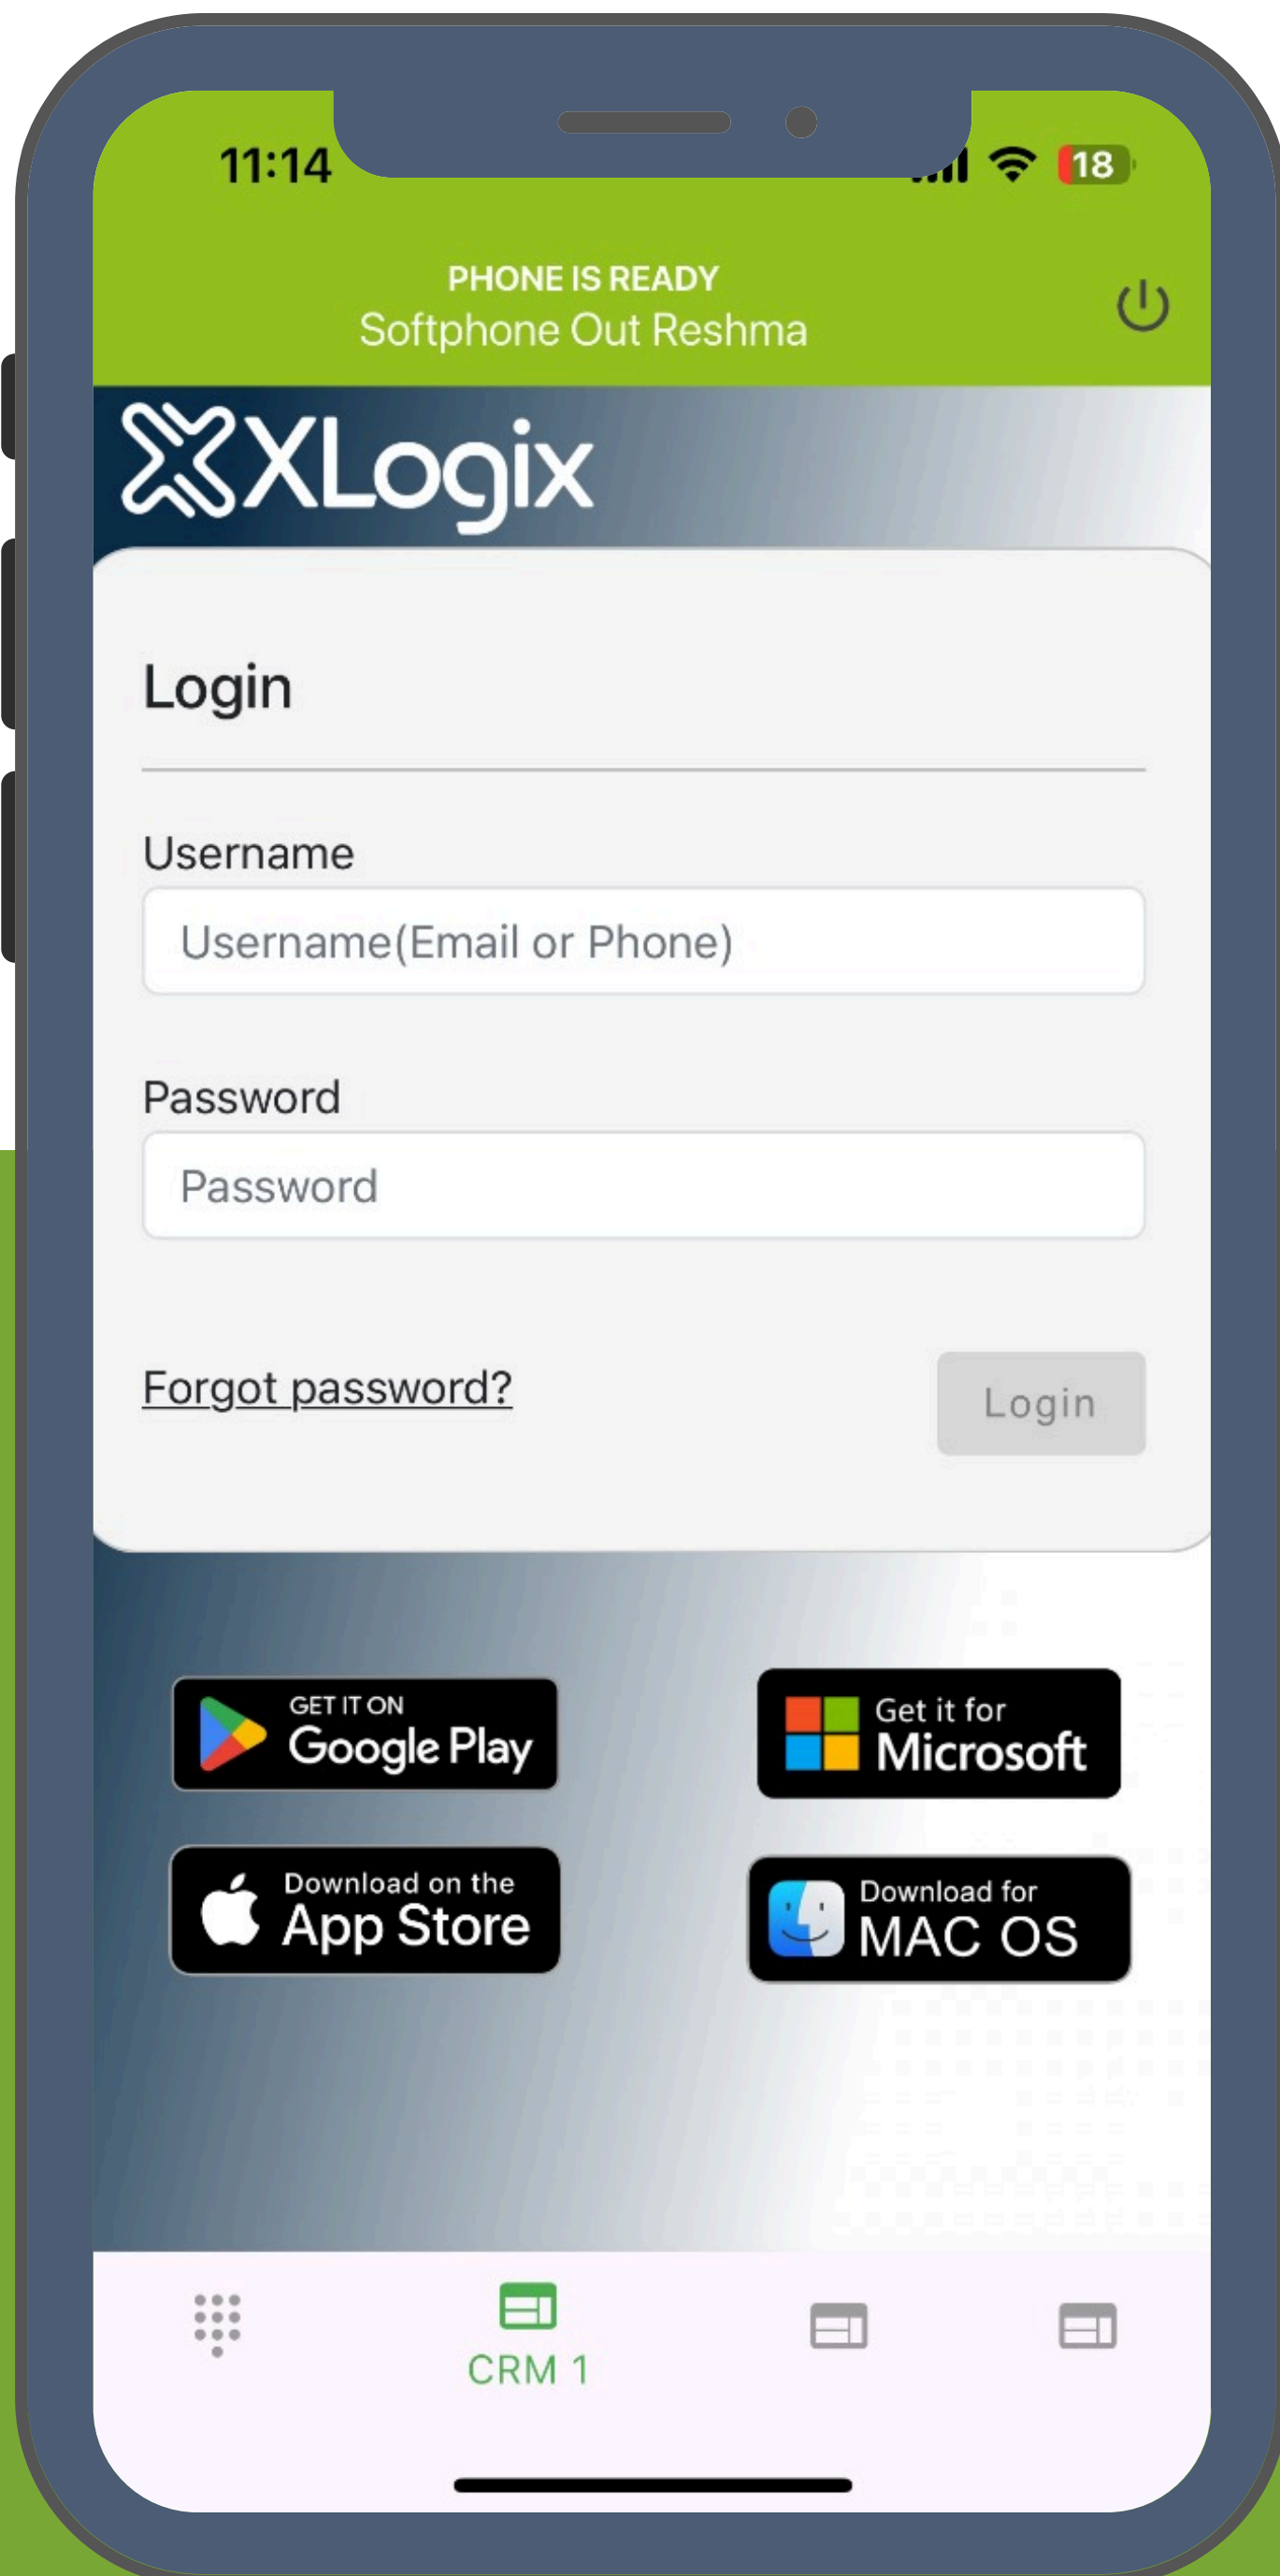

In this screen, please enter the username and password

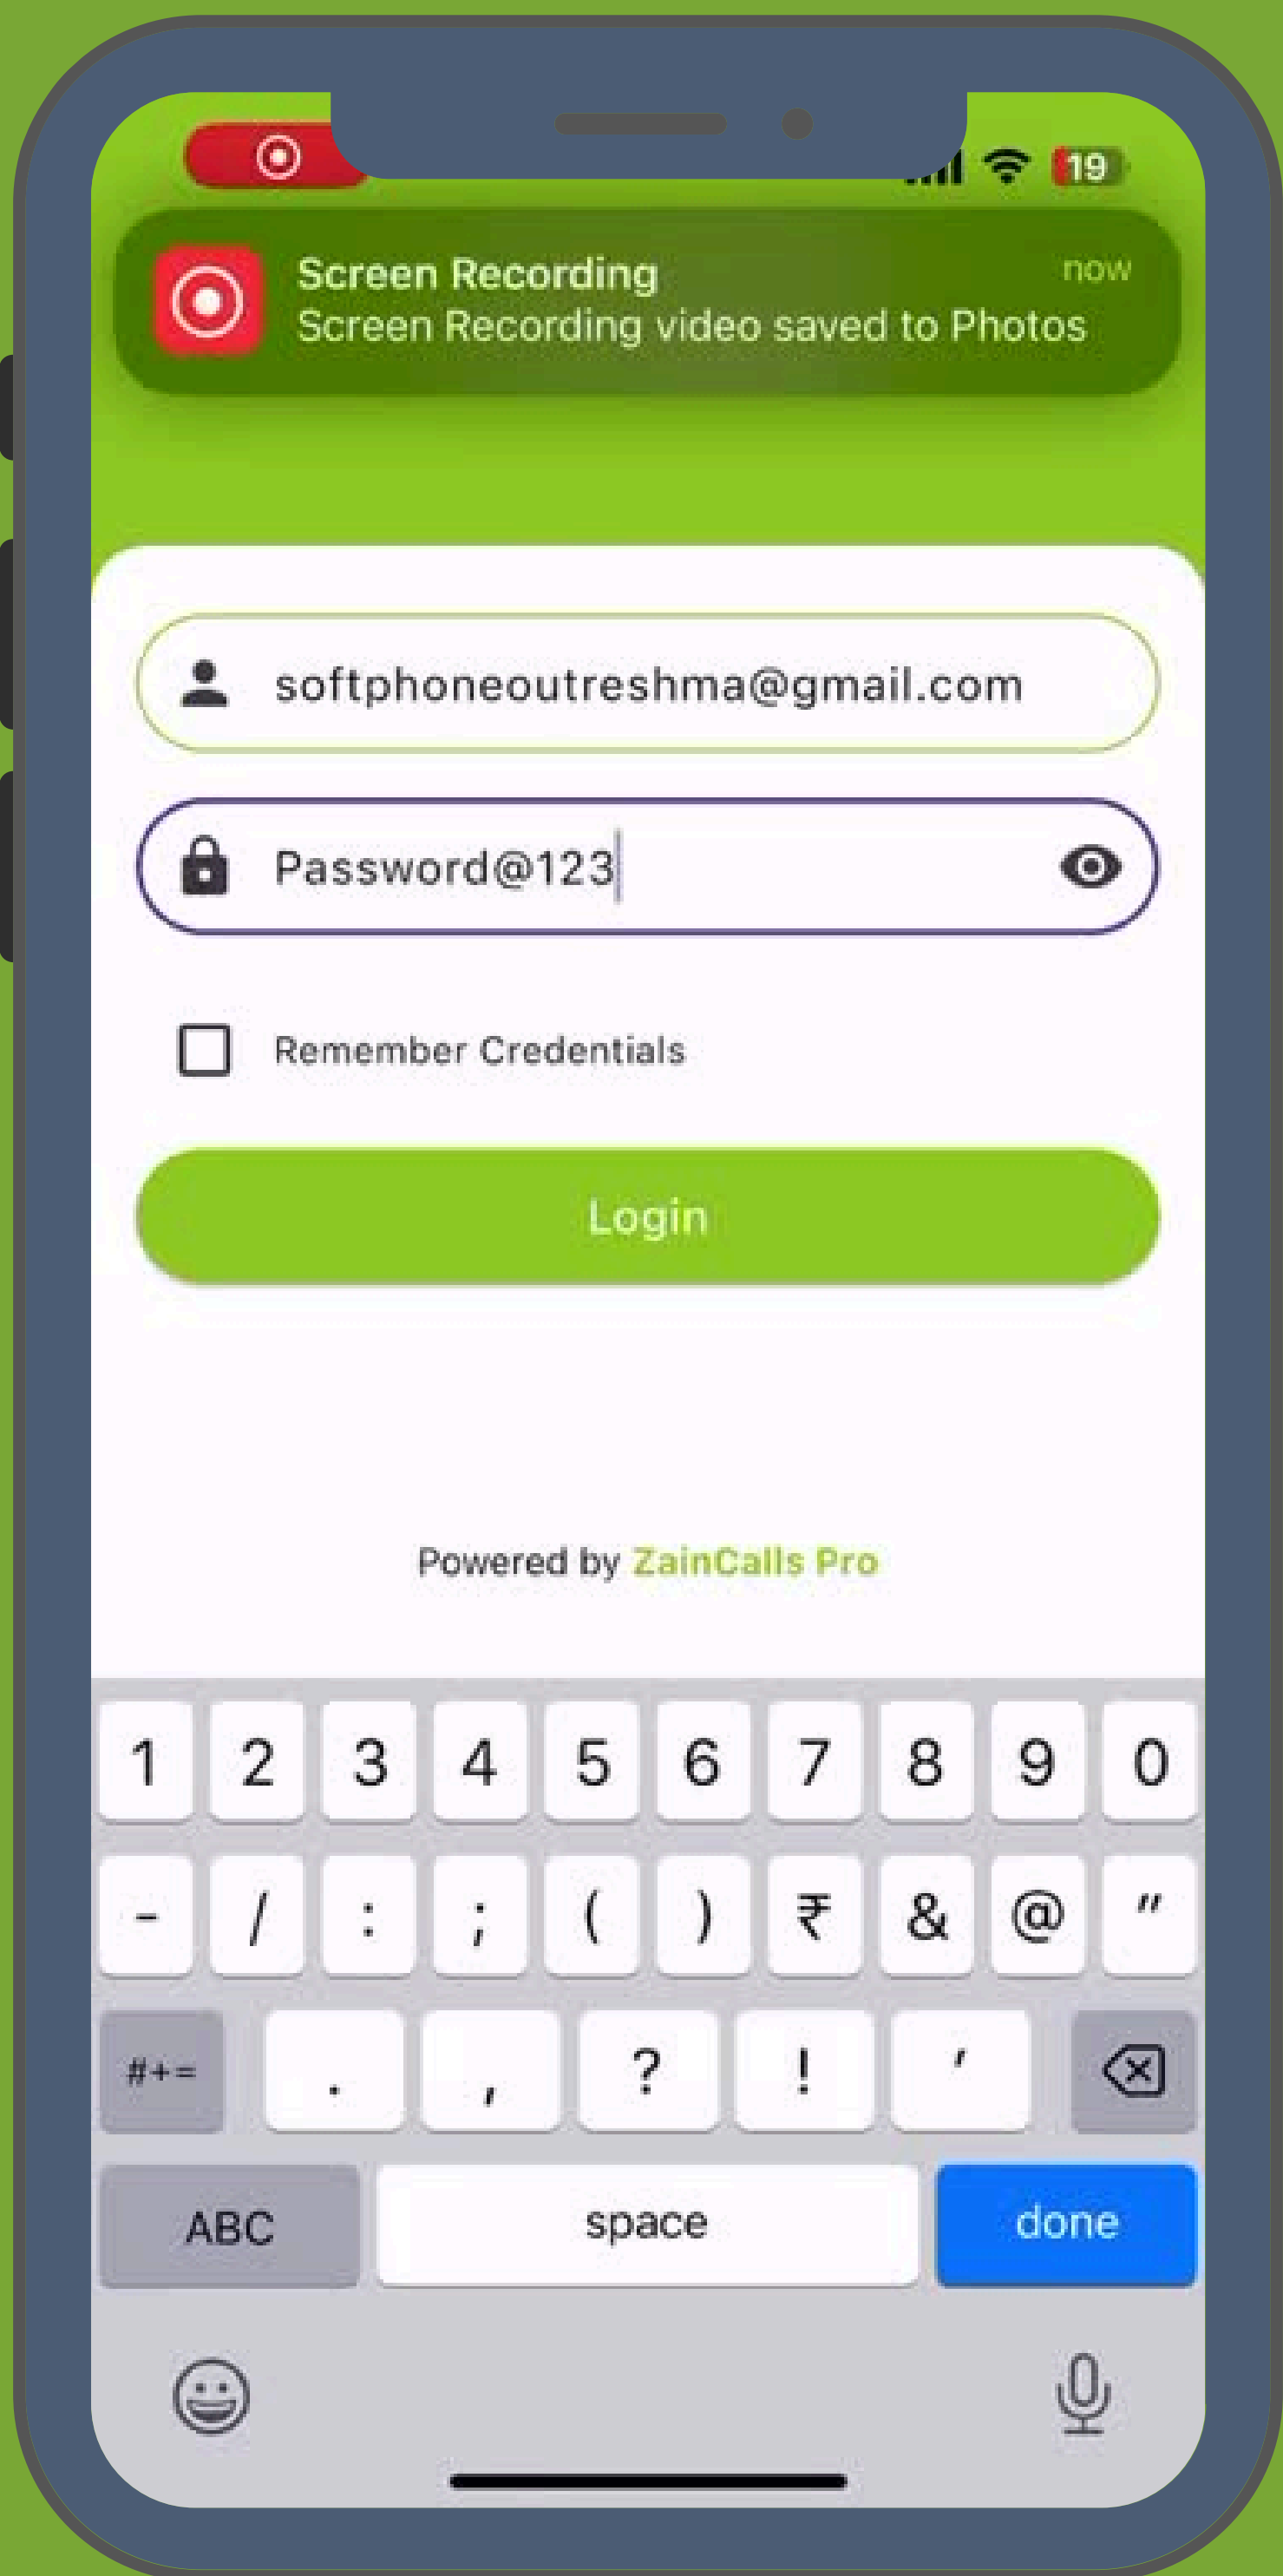

Select Campaign and Extension
from this page

Make sure that the button is
in "READY" state.

After the call, the CRM will pop up.
Please note that for the next call,
the CRM will open up in a new tab.

Please find the video
for reference

NOTE

The application must remain in the foreground; minimizing it will cause the softphone to become unregistered. This issue is part of the current testing phase and will be resolved before the final release in App Store.
