Frequently Asked Questions

▶ **IF I SWITCH TO SMART VPBX XL, WILL I NEED TO CHANGE MY TELEPHONE NUMBERS?**
No, you can retain your existing telephone numbers from BSNL.

▶ **WHAT SHOULD I DO IF I ENCOUNTER ANY SERVICE ISSUES?**
You can reach out to bsnlsupport@speechlogix.com or call 0484 2674610, and our support team will assist you with your concerns.

▶ **THE COST SAVINGS SOUND TOO GOOD TO BE TRUE. ARE THERE ANY HIDDEN FEES?**
Not at all. The Smart vPBX XL is transforming business communications. We have many satisfied clients who are eager to share their experiences and discuss the significant cost savings they have achieved with the Smart vPBX XL.

▶ **DO I NEED TO BUY NEW PHONES, OR CAN I USE MY EXISTING TRADITIONAL ONES?**
Although upgrading to IP phones is recommended, it is not mandatory. You can purchase FXS gateways from Speechlogix Technologies Pvt. Ltd. to connect your traditional phones to the PBX.

▶ **CAN I ADD EXTENSIONS OR LINES TO THE SMART VPBX XL?**
Yes, you can add extensions with specified packages. To do so, please get in touch with BSNL Sales.

▶ **IS THERE A LIMIT TO THE NUMBER OF EXTENSIONS AND LINES I CAN HAVE?**
No, there is no limit. You can have as many extensions and lines as you need.

▶ **WHAT HAPPENS IF THE INTERNET GOES DOWN?**
Businesses of all sizes can set up backup internet options, allowing the system to switch to a secondary connection if the primary one fails. Smart vPBX does not require a static IP to function.

Ready To Make The Change?

If you're considering switching to the BSNL Smart vPBX XL service, give us a call. We'll guide you through the entire process and help you choose a plan tailored to reduce your monthly phone expenses while ensuring you never miss a call. Smart Communication for Smart Living

with Our Seamless BSNL Smart vPBX XL

Smart vPBX XL offers a cost-effective phone system for Apartments, Villas and Flats looking to slash monthly expenses without the hassle of maintaining a traditional PABX.

Enhanced Collaboration
Between Residents and Management

BSNL Connecting Bharat
**SMART vPBX XL**

OVERVIEW

The Smart vPBX XL is a cloud-based IP-PBX (Internet Protocol - Private Business Exchange) system, fully managed by BSNL. Unlike traditional phone systems, it's not a physical device on your premises, but a virtual system hosted securely in the cloud.

You can keep your desk phones or use the BSNL Smart vPBX XL mobile app as an extension. Instead of relying on a traditional local telephone system, you can seamlessly connect through the internet for enhanced flexibility and convenience.

Say Goodbye To The Old, Hello To The New

The BSNL Smart vPBX XL replaces your traditional PBX system, offering enterprise-level features at a fraction of the cost, without sacrificing reliability.

Huge Savings, Powerful Features

With BSNL Smart vPBX XL, there is no need for upfront costs or hardware maintenance cost. Enjoy incredible savings, advanced features, easy usability, and exceptional technical support from BSNL, all while communicating without the stress of high monthly bills.

Integration with Other Services:
Cloud PBX can integrate with smart home systems, allowing residents to control lights, locks, or thermostats through the same app they use for calling or messaging.

Call Forwarding and Voicemail:
Calls can be forwarded to mobile phones or voicemail, ensuring that residents don't miss any important communications, even when they're not at home.

Instant Notifications:
The system can send instant notifications to residents in case of emergencies, maintenance schedules, or important announcements from building management.

Cost-Effective Communication:
Residents can make free calls between each other, reducing communication costs within the apartment complex. Local and international calls can also be more affordable compared to traditional phone systems.

Remote Communication:
If a resident is away for an extended period (e.g., vacation), they can still communicate with the security staff, maintenance crew, or management directly through the system, ensuring they stay connected with the apartment's operations.

Access Control and Visitor Management:
Residents can use their phones to grant access to visitors or delivery personnel by con-trolling building entry points (e.g., opening gates or doors remotely).

Improved Security:
In addition to video calls with security personnel, residents can get instant alerts in case of suspicious activity, enabling them to stay informed and take appropriate action when needed.

Virtual Concierge Services:
The system can enable a virtual concierge or helpdesk service where residents can re-quest assistance (maintenance requests, package delivery notifications, etc.) via chat or voice call.

Group Chats for Communities:
nts can create group chats for building events, social gatherings, or neighborhood watch programs, fostering a stronger sense of community and making it easier to stay connected.
